

# Setting boundaries online: Automate features

## Action

Use moderator alerts for key words to help you keep track of important topics or offensive language.

Turn off 'share' or 'forward' features for privacy.

Use screening questions for new members.

Allow members to report offensive content to you confidentially.

## Supported platforms

- Facebook
- Zoom
- Discord
- Slack

- Facebook
- Google groups
- Discord
- Some Microsoft applications

Different platforms have different features for this - investigate the options on the platform you're using.

Create a confidential procedure for this, through a channel you can also self-moderate.
